Citing Images with NoodleTools

START HERE: Create new citation>Website>Photo or Image (Born Digital)

9 items to include when citing an image:

1. Name of container website (where the image is from)
2. Publisher of the site (look for a logo, usually near copyright date)
3. URL (web address)
4. Date of publication (copyright date or last modified date/last update)
5. Most recent date of access (when you looked at the page)
6. Artist (name, if available)
7. Choose the type of image (photograph, illustration, image)
8. Title of image (if untitled, you may provide a brief description)
9. Date image was created (copyright date)
HOW DO I CITE AN IMAGE FROM ...

<table>
<thead>
<tr>
<th>The open web? (a web site)</th>
<th>Locate and enter the 9 items, or as many as possible, <strong>(on the other side of this handout)</strong> into NoodleTools.</th>
</tr>
</thead>
<tbody>
<tr>
<td>A search engine? (Google, Bing, etc.)</td>
<td>Click on the image. Choose “VISIT”. Cite the web page on which the image is found by finding as many of those 9 items as possible. <strong>DO NOT CITE THE SEARCH RESULTS PAGE!</strong></td>
</tr>
<tr>
<td>A database?</td>
<td>Databases usually provide a pre-formatted citation ready for you to copy and paste into NoodleTools.</td>
</tr>
</tbody>
</table>

USING IMAGES RESPONSIBLY & ETHICALLY:

Look for an image using a search engine (like Google).

Then, click on the “Tools” button.

Now click on “Usage rights”.

Depending on the license you choose, the availability of images will change. That’s the license filter at work.

Choose a license - make sure you credit the source.
